\*On 8 December 2008, the New Zealand Mortgage Fund was re-named the Income Fund and its asset allocation was changed from investment in a range of New Zealand residential mortgages to investment in deposits with registered New Zealand banks which may include a combination of fixed interest securities and cash. On 10 November 2022 the International and Global Small Companies Funds were closed to investors and as at 1 January 2023 held no funds.

\*As at 10 November 2022, funds held in the Cash Superannuation Fund, and Retirement and Emergency Fund were consolidated with the equivalent investment fund held in the Cash and Income Superannuation Fund. Future investment returns are identical for all three products. However, as there were investment fee differences prior to that date, the investment return history shown in this report is only applicable to the Cash and Income Superannuation Fund. Historic returns for the Cash Superannuation Fund and Retirement and Emergency Fund were lower (due to higher investment management fees) and are available on request.

Investments in the Products are subject to investment risk, including the loss of income and principal invested. Returns are net of tax and fund management fees that are deducted as a percentage of funds under management. They do not reflect entry, exit or other fees that are charged at an individual policy, scheme or product level. Please refer to your policy document for further information. The returns assume a lump sum invested at the beginning of the period, the reinvestment of all distributions/interest and that no withdrawals or additional investments have occurred. Returns for periods greater than one year are annualised. Negative returns are shown in brackets. Past investment performance cannot be seen as an indication of future performance as returns fluctuate according to market conditions. For more information on fees and other product information, please contact AIA.
